Dear requester

Provision of requested information and information is reasonably accessible

Thank you for your request for EDM and flow data for 10 sites, which we received on 20 April 2025. Your request has been considered under the Environmental Information Regulations 2004.

- a) All EDM recorded individual spill start-stop times;
- b) All inlet, flow to full treatment, passed forward flow, final effluent at 15-min intervals as appropriate for each SPS and STW;

for the period 1/1/2020 to the present for the following STWs and SPSs:

Ashwellthorpe STW
Buckden STW
Feltwell STW
Foxton WRC (Cambs)
Great Easton STW (Leics)
Harleston SPS
Sibbertoft STW
Welton STW (Northants)
Whilton TPS
Whitton STW

Please find attached Start Stop Time 2020.xlsx showing the start stop data available for 2020. This data is from a recent S108 submission made to the EA and is considered the most reliable historical data we hold, and BUCKST_FELTST_FOXTST_GEATST FFT Data.xlsx showing the data we hold for part b.

Start stop times for 2021 to 2024 can be found on our website [Storm overflows](#) and the most recent monthly data for 2025 can also be found on our website [Monthly EDM Publication](#). The monthly data is a summary of all EDM activations as shown on the storm overflow map. It is not quality assured to a regulatory return standard, so it has a lower data quality and should be considered indicative of an activation, rather than confirmation of a spill.

The information supplied to you continues to be protected by the Copyright, Designs and Patents Act 1988. You are free to use it for your own purposes, including any non-commercial research you are doing, and for the purposes of news reporting.
